

Fig. 2

Fig. 3

Figure 1 consists of 12 scatter plots, labeled (a) through (l), arranged in a 6x2 grid. Each plot shows the relationship between a specific variable on the x-axis and the number of children (N) on the y-axis. The variables are: (a) Age, (b) Sex, (c) Education, (d) Income, (e) Religion, (f) Ethnicity, (g) Marital Status, (h) Employment Status, (i) Health Status, (j) Social Network, (k) Parenting Style, and (l) Child Development. The plots show various patterns: (a) shows a positive correlation; (b) shows a negative correlation; (c) shows a positive correlation; (d) shows a positive correlation; (e) shows a positive correlation; (f) shows a positive correlation; (g) shows a positive correlation; (h) shows a positive correlation; (i) shows a positive correlation; (j) shows a positive correlation; (k) shows a positive correlation; and (l) shows a positive correlation.
